

PLASTIC FORMO UAB

Custom Plastic Solutions for Construction Projects

About Us

Plastic Formo UAB is a European manufacturer specializing in custom-made plastic tanks and technical equipment using advanced thermoplastic welding technologies (PP, PE).

We deliver durable, corrosion-resistant solutions tailored to demanding construction and infrastructure environments.

What We Offer

Chemical Storage & Spill Containment

Chemical tanks

- Tanks for construction chemicals and liquid materials
- Bunded tanks and spill containment pallets
- Designed for safety and environmental compliance

Water & Wastewater Solutions

Large tank

- Temporary and permanent water storage tanks
- Drainage and wastewater solutions
- Suitable for infrastructure and utility projects

Technical Chambers & Custom Fabrications

PP container

- Inspection chambers and equipment housings
 - Custom-made plastic structures based on drawings
 - Integration-ready for electrical and process systems
-

Key Benefits

- Corrosion-resistant (ideal for aggressive environments)
 - Lightweight (faster transport and installation vs steel or concrete)
 - Custom-made (tailored to your exact project requirements)
 - Durable and low maintenance
 - Fast production for time-sensitive projects
-

Applications

- Construction sites and temporary installations
 - Water treatment and infrastructure projects
 - Industrial construction
 - Environmental systems
-

How We Work

- Production based on your drawings or specifications
 - Technical consultation and material selection
 - Flexible quantities (single units to series)
 - Reliable delivery across Europe
-

Why Work With Us

- Proven experience in Scandinavian markets
 - Focus on practical, cost-effective solutions
 - Strong engineering and customization capabilities
-

Let's Work Together

We are ready to support your current or upcoming projects.

Send us your inquiry or drawings — we will propose the best solution.
