

ABOUT US

Fach-Met is a modern tool company. We specialize in fulfilling the orders of our customers in the fields of automation, pneumatics and maintenance.

The accuracy and precision of the machines in our plant, the involvement of qualified employees and the use of top-class tools make it possible to obtain precise parts of the highest quality.

The entire process of manufacturing parts is controlled using high-quality electronic and legalized measuring tools.

FROM EUROPE TO ASIA

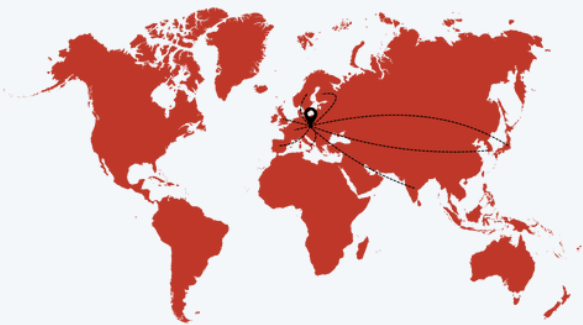

We cooperate with customers and partners from different countries and regions, adapting its services to international standards and specific market requirements.

Our flexibility and experience allow us to work effectively with companies around the world, guaranteeing high quality and timely delivery. Dozens of companies from a wide range of industries and specialties have taken up operations with us.

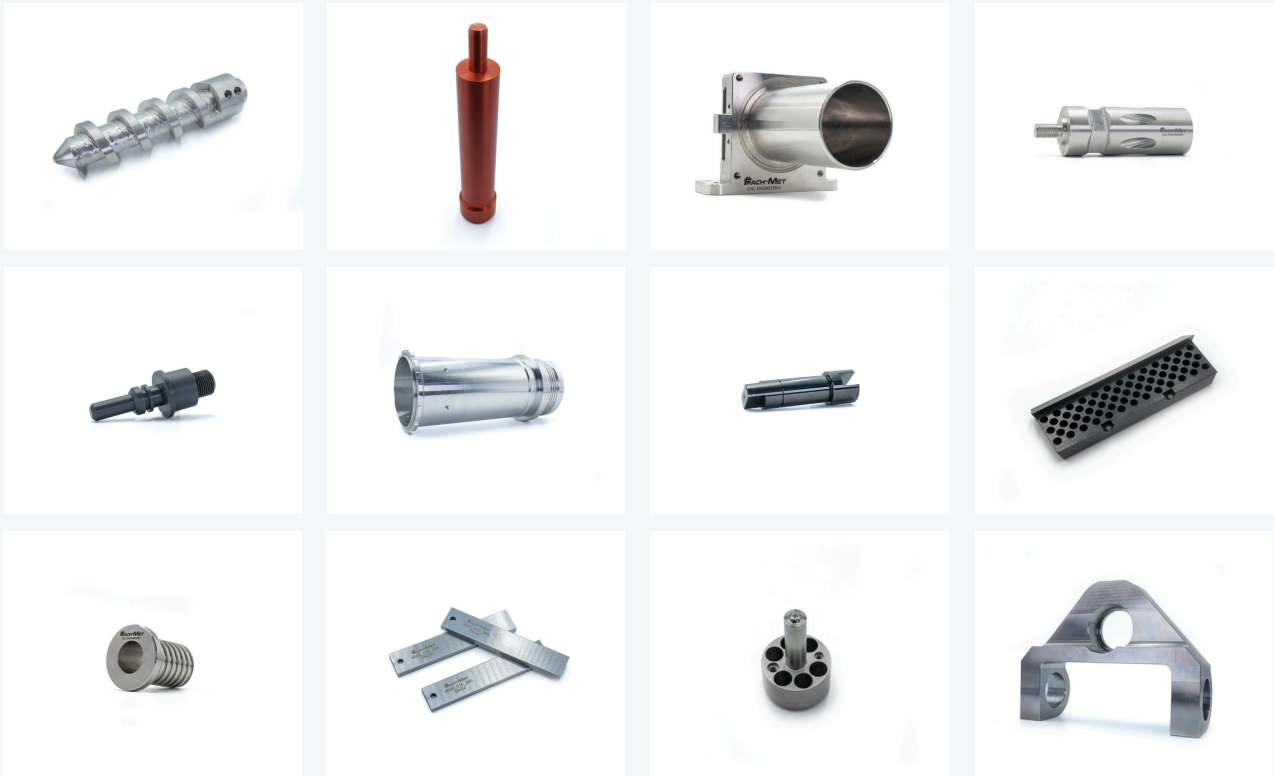

MACHINERY PARK

We carry out our realizations using machines from MAZAK, DMG MORI, CORMAK, HERMLE, FANUC, KNUTH or MITUTOYO

SAMPLE PROJECTS

OUR SERVICE

● CNC MACHINING

We specialize in high-precision CNC machining, including milling and turning, which allows us to carry out even the most demanding projects. With modern technology and experience, we guarantee the highest quality, precision and customization.

● GRINDING

Fach-Met offer precision grinding that provides the highest quality surface finish. Our services are the perfect solution for parts that require a precise finish, such as technical parts or machine components.

● QUALITY CONTROL

With modern measuring instruments and advanced technology, we can precisely verify every detail, meeting the expectations of even the most demanding customers. We perform measurements on certified machines.

● MAINTENANCE

Our company provides comprehensive maintenance support, minimizing downtime and increasing machine efficiency. With modern tools and experience, we guarantee fast, effective diagnosis, repair and maintenance.

● SHEET METALWORKING & WELDING

Offering precision sheet metal work, including cutting, bending and forming, ensuring robustness and accuracy. We also specialize in welding, making durable and aesthetically pleasing welding joints in accordance with design requirements.
